Fabrication Site Construction Safety Practices

**Vision**

- Develop and publish a set of common minimum oil & gas industry construction safety recommended practices and a set of enabling activities and a resource library to complement and support the implementation of these recommended practices

**The Recommended Practices (RPs), enabling activities, and resource library aim to:**

- Improve performance – provide a reduction in workplace incidents
- Deliver consistency – a single approach to specific high hazard activities; consistency provides more time for site safety rather than reconciling approaches and learning requirements
- Improve experience transfer and learning across oil & gas projects and fabrication industry practices for contracted work carried out at fabrication sites

**Accomplishments since the previous newsletter**

- Fabrication Site Construction Safety Recommended Practices has been approved by IOGP Safety Committee and IOGP Management Committee and issued as IOGP Publication no. 577, document is available at: http://www.iogp.org/Reports/Type/577/id/2860
- First draft of Phase II of Recommended Practices has been prepared for eight Enabling Activities Recommended Practices
- Submitted paper and presentation titled “Achieving Common Requirements for Improved Safety and Efficiency” for the 2017 Asia Pacific Health, Safety, Security, Environment and Social Responsibility (HSSE-SR) Conference, being held from 4-6 April 2017 in Kuala Lumpur, Malaysia
- Submitted abstract titled “Improving Fabrication Site Construction Safety with Industry Standardization” for 2017 SPE Annual Technical Conference and Exhibition, held from 9-11 October 2017 in San Antonio, USA

**Accomplishments in the next 30 days**

- IOGP members, contractors and EPCM companies will be encouraged to initiate the adoption of Fabrication Site Construction Safety Recommended Practices
- First draft of Phase II of Recommended Practices for eight Enabling Activities Recommended Practices will be circulated for Task Force Member Company internal reviews
- Planning for the IOGP Task Force face-to-face meeting in London, April 18-20, will be finalized

**Other Information**

- All activities associated with this IOGP project are conducted in close alignment with the Korean Site Safety Standardization initiative currently underway
- Contractors and EPCMs selected for the sounding-board review were voted on by the Task Force based upon previous experience with fabrication sites, global geographic spread, etc.
- Current Task Force members: BP, Chevron, ExxonMobil, Kosmos Energy, Oil & Gas UK, Shell, Statoil, Total.
**Schedule Needs/Concerns**

- No current schedule concerns.
- Target publication dates for phase II to be agreed with IOGP.

---

**Project Schedule Overview**

- **Q4 2016**: Establish Sub-committee work groups. ShareFile open for document uploading. Sub-teams developing RPs.
- **Q1 2017**: Identify EPCMs and Contractors. Between now and April Task Force members ensure relationships with EPCMs & Contractors are developed.
- **Q2 2017**: First draft due Jan. 31. Sub-team revising draft based on input due Mar. '17. Pre-Read circulated two weeks before Apr. '17 F2F. Develop Contractor engagement materials / plan.
- **Q4 2017**: Comments incorporated into draft. IOGP Safety Committee review of Final Draft. Final draft completed Phase II / Reference Library. Publication of Reference Library - Approx. Feb '18. Sub-teams revising draft based on input due Mar. '17. F2F. Develop Reference Library. Internal review for key issues or red flags*¹. Pre-Read circulated two weeks before Apr. '17 F2F. External review for key issues or red flags.

---

**Key:**
- Delivered
- Lagging or Behind Target
- Resources Needed
- Pending Completion

---

*¹Detailed internal member company reviews have been completed and agreed at April F2F, this review is therefore not a detailed content review.
