Production Indicator Map 2019

The map above shows the division of the world into seven regions. The delineation of zones is not intended to reflect offshore boundaries.

IOGP Production Indicator® (PI)
The IOGP Production Indicator® (PI) for oil is based on dividing daily production in thousands of barrels (or, for gas, billion cubic metres per year) by demand. The Production Indicator indicates the level of a region’s self-sufficiency (and export potential). A Production Indicator above 100% demonstrates the ability to export; below 100% shows the need to import.
